

AKVELON Projects With Microsoft Dynamics™

Microsoft Dynamics

01 CRM Mobile Express for Microsoft Dynamics CRM 4.0

Built CRM Mobile Express – an extension of Microsoft Dynamics CRM 4.0 that allows CRM functionality on all common smartphones. CRM-ME provides the convenience of using a familiar interface with no required installation while increasing productivity through streamlined access to customer information from any web-enabled mobile device.

1

02 Upside Commerce

Created software to improve pricing strategies and minimize revenue loss for companies. The integrated trade management solution makes it easy for companies to develop and analyze price lists across a varied customer and product portfolio. By combining business intelligence with trade planning and execution, the solution can greatly enhance revenue benefits as well. Additionally, the extremely cost efficient software combines numerous Microsoft products, including SharePoint and Dynamics AX.

2

Windows Azure

04 Azure Hosted CRM Trial Accounts

Built and managed an end-to-end solution for Azure Trials (Azure hosted CRM), enabling users to download and drive relevant data and analytics via the Azure platform.

4

03 Christian Aid Finance Management System

Implemented a Dynamics CRM based system allowing Christian Aid to manage multiple data-entry points to a centralized data repository. This solution ensures the work performed by one person is never duplicated at a later time, improving efficiency and eliminating the risk of inaccuracies in the data.

03

5

05 Dynamics CRM Global Search Online/On-Premise

Developed Global Search for Microsoft Dynamic CRM 4.0, which enables the user to view search results of all CRM entities in a single view, click through each found record, and perform a sub-search on each record type.

05

6

06 Dynamics CRM Global Preview Online/On-Premise

Developed Global Preview for Microsoft Dynamics CRM, a program which allows the user to simply highlight the row in any CRM list and information about the entity will appear in the Preview Pane, saving time and improving efficiency.

06

7

07 CRM Tracker for Android

Created the Akvelon CRM Tracker application for Android. The application enables users to track client CRM transactions and attach calls in Dynamics CRM records while on the go. It is compatible with Microsoft Dynamics CRM 2011 Online, CRM 2011 and CRM 4.0 On-Premise.

07

Microsoft Dynamics AX

1

01 Dynamics Retail Cross Platform Device & Mobile Dev.

Performed end-to-end engineering for Microsoft Dynamics for Retail. Implemented POS client features, developed test automation, fixed bugs, and ran test cases for Dynamics for Retail Feature Pack across Win8, Android, and iOS mobile platforms. Actualize client application features for Retail for Dynamics Rainier.

01

02 Dynamics AX for Microsoft Retail Stores

Assisted in implementing change requests and customizations, which will contribute to customizing AX 2012 for Microsoft Retail Stores. Utilized and improved the Dynamics CRM connector to integrate data between AX and CRM.

2

3

03 Kernel Engineering

Performed sustained engineering for Microsoft Axapta Kernel and AX Foundation. Solved product issues by following sustained engineering team processes, gateways, and timelines for customer issues of multiple priorities. Akvelon has effectively combined both on-site and off-site engagement models to create an optimal balance of effectiveness and costs.
